# DayTradeScanner BluePrint

Past performance is not indicative of future results.

---

# This the ULTIMATE Guide to Trading DayTrade Scanner:

Past performance is not indicative of future results.

# Who can trade DayTrade Scanner:

ANY SINGLE Trader can trade DayTrade Scanner.

Most of Our Signals a trade can get in for LESS than \$50 per trade

Individual Trader to Hedge Fund Manager

Past performance is not indicative of future results.

# What is DayTrade Scanner

DayTrade Scanner scans thousands of option orders each day to apply the same proprietary filters used by professional market makers.

The result is a series of 2-12 real-time notifications for trades placed by hedge funds, banks, and other major institutions that are the most "unusual."

DAYTRADE SCANNER Signals are ONLY created to DayTrade NOT to hold ANY positions Overnight

**N**

**explained**

Past performance is not indicative of future results.

---

# When do Signals come on DayTrade Scanner:

They start EVERY single morning at the Opening Bell: 9:30 AM Eastern

They ONLY run for 1 Hour to 10:30 AM Eastern

Past performance is not indicative of future results.

# Where do the Signals come From?:

We use a PROPRIETARY Algorithm that Flags the BIGGEST Potential Winners and Losers based on Unusual Options Activity

Every price is the EXACT price traded from one of the 12 trading exchanges

Past performance is not indicative of future results.

# Why Trade DayTrade Scanner:

In Our Opinion, DayTrade Scanner is the ONLY way to make MONEY as a  
RETAIL Trader

Big Hedge Funds, Institutions and Funds are trading on “INSIDER  
Information”

This one of the ONLY places to get these TRADES Real-Time and LIVE

WAIT BUT WHY

Past performance is not indicative of future results.

---

# Now Lets Break down EVERY Single that Hits the Tape:

Trades Per Day: 2-10

## Example of OptionHacker on 11.9.2020

SWEEP DETECTED:

>> **DayTrade Signal 512 WBA 2020-11-13 42.0 Calls \$0.335 OI=337 \$41.35 Ref**

Target #1 \$0.42,Target #2 \$0.50 Stop Loss \$0.17 (10:07:34 ET)

>>Market Color **WBA** - I LOVE these because 1. Calls 2. Under \$.40 (*Andrew Keene (AlphaShark Trading)*)

[WBA 41.65 -0.69 Ref, IV=42.6% +8.5]

SWEEP DETECTED:

>> **DayTrade Signal 308 SPCE 2020-11-13 22.0 Calls \$0.577 OI=3265 \$21.57 Ref**

Target #1 \$0.72,Target #2 \$0.87 Stop Loss \$0.29 (10:10:50 ET)

SWEEP DETECTED:

>> **DayTrade Signal 823 MOMO 2020-11-13 16.5 Calls \$0.27 OI=215 \$15.98 Ref**

Target #1 \$0.34,Target #2 \$0.41 Stop Loss \$0.14 (10:17:17 ET)

>>Market Color **MOMO** - I cant tell if they are bought or sold so I am NOT taking these (*Andrew Keene (AlphaShark Trading)*) [MOMO 16.02 +1.13 Ref, IV=71.3% -2.1]

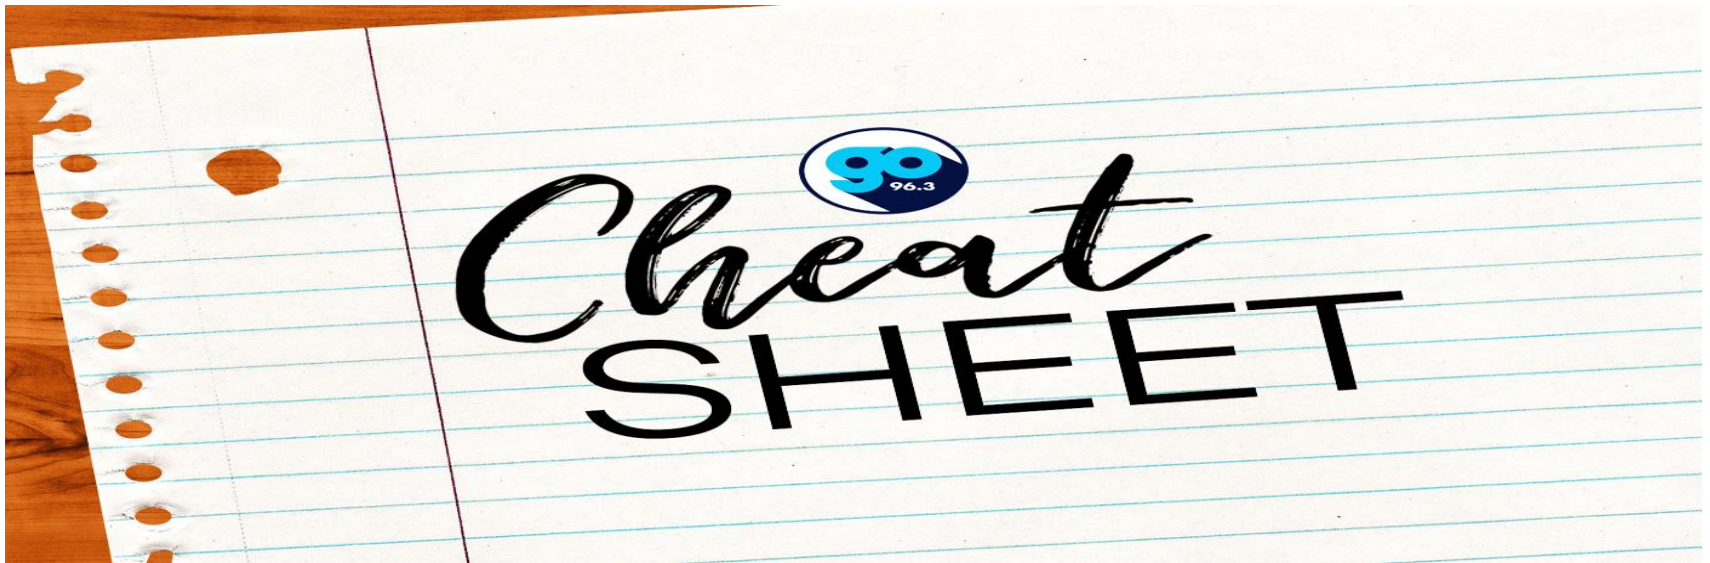

>>Market Color **WBA** - Taking off Both Day Trades for a Winner (*Andrew Keene (AlphaShark Trading)*) [WBA 41.52 -0.81 Ref, IV=37.0% +2.9]

Past performance is not indicative of future results.

# Cheat Sheet:

In our Proprietary Based Cheat Sheet, we will give you a list of sectors and companies to avoid on Option Hacker

Past performance is not indicative of future results.

---

# Market Color:

Multi-Millionaire Trader Andrew Keene writes his OPINION on EVERY single trader

**commentary**

---

⋮ Past performance is not indicative of future results.

# Calls vs. Puts:

Calls are the right but NOT obligation to BUY stock at a certain price by a certain expiration

Puts are the right but NOT obligation to SELL stock at a certain price by a certain expiration

CALL  $\Rightarrow$  PRICE   
PUT  $\Rightarrow$  PRICE 

The diagram consists of two lines of text. The first line reads 'CALL' followed by a right-pointing arrow, then 'PRICE', and finally a green upward-pointing arrow. The second line reads 'PUT' followed by a right-pointing arrow, then 'PRICE', and finally a red downward-pointing arrow. The text is in a handwritten style.

# Put Options:

We have included PUTS on the Scanner, but as of 11.9.2020 we suggest NO trader takes these signals because the kind of market we are in.

If things change we will shift to taking more PUT options

# ANY Option under \$.50:

These are my FAVORITE Options.

Try to get in as FAST as possible.

Targets will always be 1.25 and 1.5 times what pay for the option

So, a \$.30 option only has to go to \$.38 to make 25% Profits

Past performance is not indicative of future results.

# Options \$.50-\$1.00:

These are my second favorite options

If a trader takes these trade SMALLER

Targets will always be 1.25 and 1.5 times what pay for the option

So, a \$.80 option only has to go to \$1.00 to make 25% Profits

Past performance is not indicative of future results.

# Options \$1.00-\$2.00:

Proceed with Caution

Does NOT mean that these are NOT good signals, the stock just has to move a LOT more

Past performance is not indicative of future results.

# Other Factors to Consider

## How Much Stock Trades in a Day

| Last X    | Net Chng | Bid X   | Ask X   | Size  | Volume      | Open  | High  |
|-----------|----------|---------|---------|-------|-------------|-------|-------|
| 46.0844 D | -2.2156  | 46.06 V | 46.09 N | 4 x 1 | 388,302,173 | 51.29 | 54.20 |

| Trade Grid  |
|---|
| .B200904C33 LB 100 (Weeklys) 4 SEP 20 33 CALL N/A N/A B: N/A A: N/A |
| B: N/A x N/A A: N/A x 0 Level II                                    |

NIO Trades 388 Million Shares in a Day, so a 5,000 lot only controls 500,000 shares,  
So it is NOT that big of a TRADE

Past performance is not indicative of future results.

# Other Factors to Consider

## How Much Stock Trades in a Day

|    |     |   |       |     |       |           |    |        |        |   |   |    |
|----|-----|---|-------|-----|-------|-----------|----|--------|--------|---|---|----|
| 19 | 278 | 0 | 1,059 | 0 T | .15 X | 20 NOV 20 | 23 | 2.10 X | 2.30 C | 0 | 0 | 66 |
| 0  | 43  | 0 | 1,193 | 0 T | .15 X | 20 NOV 20 | 24 | 3.10 B | 3.30 Z | 0 | 0 | 36 |
| 0  | 32  | 0 | 768   | 0 J | .10 C | 20 NOV 20 | 25 | 4.10 B | 4.30 Z | 0 | 0 | 14 |

I always put the Bid Size and Ask Size.

If the Ask Size is 300 plus, it will be HARD to move the offer, making it harder to make MONEY.

Past performance is not indicative of future results.

# Other Factors to Consider

What is the Stock's ATR

ATR is the Stock's: Average True Range

This is how much the stock moves from high to low on average in a day.

Do NOT take stocks where ATR is less than \$.40

The Higher the ATR, the BETTER

Past performance is not indicative of future results.

# Other Factors to Consider

## Pre and Post Earnings

>>Unusual Volume U - 3x adv: 20.8k contracts vs 6944 adv, 52% calls, 48% of OI Post-Earnings [U 114.97 +13.22 Ref, IV=94.6% -8.5]

Pre-Earnings is HARD and trader should trade MUCH smaller.

Sometimes I avoid POST Earnings as Well

Past performance is not indicative of future results.

# Other Factors to Consider

## Chasing Trades

>> DayTrade Signal **545 PLUG 2020-11-13 25.0 Calls**  
**\$0.217** OI=6029 **\$23.23 Ref**  
Target #1 \$0.27, Target #2 \$0.33 Stop Loss \$0.11  
(10:20:20 ET)

Do NOT chase and pay MORE than 10% more than the Signal

There will ALWAYS be MORE Trades

If you pay up to \$.27, that is another traders targets

Past performance is not indicative of future results.
